

## Nevada State Board of Medical Examiners

***Press Release – March 3, 2008***

### **BOARD OF MEDICAL EXAMINERS INQUIRES INTO HEPATITIS C OUTBREAK**

As the result of the breaking news concerning possible exposure to patients of blood-borne pathogens from procedures performed in a Las Vegas medical clinic, the Nevada State Board of Medical Examiners has commenced an investigation into the allegations concerning the procedures and individuals involved.

The Board is working with other public agencies in obtaining information and evidence related to the patient treatment. If the investigation and evidence demonstrate violations of the Nevada Medical Practice Act, NRS 630, appropriate actions will follow.
