AGENDA ITEM 10(c)

The Clark County Medical Society has been working since the March on providing our members with the most up to date information available on Covid-19. Our website went on a daily update process in order to keep the public and physicians aware of trends and news. Information was curated from health experts from all over the globe with special attention to the Southern Nevada Health District. CCMS provided our Speakers Bureau to assist the media in providing the most up to date information from local physicians. Several Townhall Meetings, many of them with CME on different Covid related topics have been held and more are planned for the near future. We thank UMC for their assistance in this effort.

All meetings and events including our Annual Installation and Gala have been provided on virtual platforms. We invite you to watch the 60-minute Gala from our website at www.clarkcountymedical.org or on YouTube. CCMS gratefully acknowledges the physicians who donated to the Scholarship Foundation during the Gala. The community nominated First Responders, Nurses and Medically Related Nonprofits for the Winged Heart Awards, those as well as other award winners are featured in the Gala, on our website and in the CountyLine Online Magazine.

Renewal of memberships is taking place now and we encourage all physicians to join the society and pay their dues as soon as possible. Current members are asked to update their profiles from the website to provide the most up to date info.
CCMS will be holding the Annual Residents' Fair. Didactic session will be held Dec 8 and the job fair portion will be Jan 26. Registration is available to practicing physicians who might like more info on CV building or student loan payback as well as all resident physicians. Anyone looking to recruit a resident to their practice should consider a table at the job fair.

Mark your calendar for March 30, Physicians Day at the Legislature and keep checking the CCMS website for more information on all our programs and benefits.
